Closing journey activities guide

In the next few days, we will publish for you a full version of the Closing Journey Activities Guide.

Use the Closing Journey Activities Guide and you will no longer need to train users in a complicated way to carry out the individual steps at the end of the month - correcting the odometer, adding cost, checking journeys, etc. before closing the journey activities.

The closing guide will take the user through all the necessary steps and in the final summary, the user will also see the billing for private km and can send the journey activities to his/her supervisor.

Průvodce uzávkou Agenda pro správce

Za zvolené období zbývá dokončit uzávěrku za 2 vozidel, u kterých jste uveden jako odpovědná osoba.

NEW FEATURE - New Version of the WD Driver App

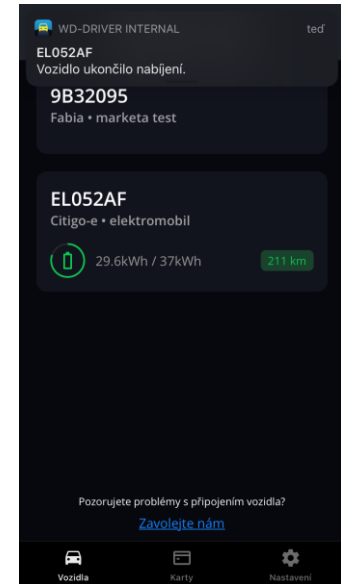

Download the new WD Driver 2.0.5 version for iOS and 2.0.2 for Android.

In the new version, we have added push notifications (alerts) for you about the charging status of your electric vehicle.

Now the mobile app will proactively alert you to:

- Connect the cable to the charger
- Start the charging
- 80% charge
- 100% charge
- Finish the charging
- Disconnect the charger cable

In addition, you can also monitor your charging status directly in the WD Driver app at all times.

If you like the app, please rate us with 5 stars. If you want to give us 4 stars or less, just give us some time, we will improve the app and then give us 5 stars 😊

NEW FEATURE - Vehicle tachograph archive - displaying files

A checkbox has been added to the vehicle tachograph archive for displaying/not displaying the backup without driver activity.

Nástroje = Dispečerské nástroje = Archiv tachografů vozidel

NEW FEATURE - API `_getAllCarsPosition`

Return pf geocoded positions for all vehicles:
A new parameter `<geocode>` has been added to the API function `_getAllCarsPosition`, which can take the following values:

- 1 - all positions are geocoded
- 0 - position without geocoding is returned
- not filled in - the current status will be maintained, i.e. only the first 10 geocoded positions will be returned

The screenshot shows the documentation for the `_getAllCarsPosition` API endpoint. The page has a dark header with the logo and title "API Webdispatching" and a search bar. Below the header is a navigation menu with tabs for "Introduction", "Compatibility", "Reference guide", and "Examples". The "Reference guide" tab is active, and the page title is `_getAllCarsPosition`. The content includes the API version (2.0), the endpoint signature `WDS_Position[] _getAllCarsPosition (string kodf , string username , string pass , int geocode)`, and a description: "Function returns information about all current vehicle positions. Returned positions (Zs, Zd, latitude, longitude, etc.) are independent of car log book. This positions are incoming from vehicle periodically as part of state message of the vehicle (STA message)."

NEW FEATURE - API `_setCarCosts`, `_delCarCosts`

A modification to the API functions `_setCarCosts` and `_delCarCosts` has been made, when the "Edit only manually entered costs" setting was not evaluated in the user rights settings. Prior to the fix, the user had the ability to edit any cost and delete it.

A new return value (-6) has been added to the `_setCarCosts` API function, which the API function will return when trying to edit a cost that has not been manually entered by the user. For the `_delCarCosts` API function, (-2) is returned

The screenshot shows a user rights configuration interface for 'Uživatel: Adela A10'. The interface is divided into several sections: 'Práva', 'Vozidla a řidiči', and 'Přihlašovací tokeny'. The 'Práva' section contains a list of permissions, each with a checkbox. The checkbox for 'Editace nákladů pouze vlastnoručně zadaných' is checked and highlighted with a red rectangle. Other permissions include 'kompletní editace knihy jízd', 'editace řidiče', 'editace účelu', 'editace účelu pouze výběrem z comboboxu', 'editace typu jízdy (soukromá/služební)', 'editace skutečného stavu tachometru', 'editace poznámky', 'editace informací o firmě', 'Povolit vkládání nových jízd', 'Povolit vkládání služebních jízd', 'Povolit vkládání soukromých jízd', 'Povolit slučování jízd', 'Povolit rozdělování jízd', 'Povolit mazání jízd', 'Editace seznamu řidičů', 'Editace vzhledu vozidla', 'Editace vzhledu knihy jízd u vozidel s právy pro zápis', 'Editace nákladů a tankovacích karet', 'Zobrazovat soukromé jízdy', 'Zobrazovat knihu jízd', 'bez omezení', 'od poslední uzávěrky', 'posledních [] dní', 'od datumu []', 'Zobrazovat stav tachometru', 'Zobrazovat mapu', 'Spedice', 'Povolit mazání SMS', 'Povolit zápis absencí', and 'Povolit zápis docházky'.

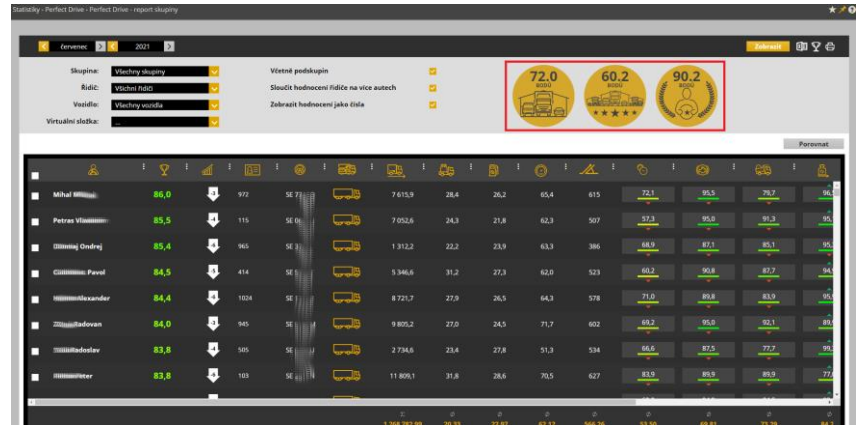

NEW FEATURE - Perfect Drive

3 values have been added to the report:

- Average rating of your company's drivers
- Average rating of drivers from all companies
- Rating of the best driver per month from all companies

Note:

Only drivers who drive more than or equal to 100 km are entered in the calculations.

CLOSING WORDS

We hope that you have found useful information in this issue to make it even easier for you to work with your fleet.

Thank you for your confidence in us.
